WORK EXPERIENCE

Bitquery

Backend Developer

Feb. 2021 – Sep. 2024

Paphos, Cyprus

- Developed and maintained core systems, including an ETL processor, GraphQL API, and [Explorer](#) website for blockchain analytics.
- Added support for multiple blockchains (Tron, Ton, Everscale, Flow, Elrond), leveraging both **Ruby** and **Golang** stacks, that involved:
 - Deploying and configuring blockchain nodes and parsers in Docker and Docker Compose.
 - Developing ETL processors to extract and transform raw blockchain data into a structured format (e.g., transfers, calls, events).
 - Defining Protobuf schemas and setting up data streaming with Kafka for real-time data delivery.
 - Storing and managing data in ClickHouse for optimized analytics.
 - Implementing GraphQL APIs for data access and visualization in the Explorer project.

Expobank

Backend Developer

Jen. 2020 – Apr. 2020

Moscow, Russia

- Developed and enhanced web interfaces for loan issuance and processing as part of a collaborative team.
- Utilized PHP 7.1, MySQL, JavaScript, jQuery, HTML5, and CSS3 to improve functionality and user experience.

PROJECTS

- [incache](#) - Thread-safe caching library for Go.

EDUCATION

Plekhanov Moscow Technical College

Information system and programming

May, 2021

Moscow, Russia

SKILLS & INTERESTS

- **Skills:** Golang; Ruby; Bash; Ruby on Rails; ClickHouse; GraphQL: Kafka; Protobuf; Docker; Docker Compose; Git; Ansible; Linux; Vim;
- **Interests:** Board Gaming; Hiking
